# Jasem Ahmad Alyounes

## Senior Software Engineer | Databases, Systems & IT Infrastructure

Beirut, Lebanon • Open to on-site or fully remote • WhatsApp: +1 (931) 623-7215
jasemalyounes@gmail.com • github.com/jasemalyounes-rgb • jasemalyounes-rgb.github.io

### PROFESSIONAL SUMMARY

Software engineer with **14 years of experience** spanning application development, relational database design and administration, Linux server and network infrastructure, and technical team leadership. Comfortable operating as the single technical owner in organisations without a dedicated IT function — writing the software, running the servers, and training the staff who use them. Deep specialisation in **Odoo ERP (v12–v19)**, with a module **published on the Odoo App Store**. M.Sc. in Web Science. CCNA certified. Fluent in Arabic and English.

### EXPERIENCE

#### Independent Software & ERP Developer

Sep 2024 – Present

- Replaced a spreadsheet-based production tracking system (**16 linked sheets, ~13,000 historical records**) with a custom Odoo 19 manufacturing module covering laser preparation, milling, measurement, QC, grading and packaging workflows.
- Published **Smart Task Planner** on the Odoo App Store — a standalone Odoo 19 project-management app with interactive Gantt, seven-stage kanban, timesheets and executive dashboards, built with **no Enterprise dependency**.
- Delivered Odoo 19 migration and compatibility work: deprecated fields, XML encoding issues and view-architecture changes across upgraded modules.
- Built custom inherited XML views, list-view actions and OWL components; backend logic in Python over PostgreSQL.
- Managed Linux VPS environments end to end: Nginx reverse proxy, SSL/HTTPS, systemd services and automated backups.

#### Head of Technical Department

Lazer Net ISP • Damascus, Syria • Jan 2019 – Sep 2024 • *Promoted from Systems Engineer*

- Led technical operations with an engineering team, owning the full project lifecycle from requirements analysis through deployment and support.
- Designed and maintained complex Oracle and SQL relational databases, ensuring data integrity and query performance at scale.
- Built internal tooling and management reporting, including technical progress reports and risk documentation.
- Managed network infrastructure, hardware and software troubleshooting, and IT support across all sites.
- Designed and delivered technical training in programming, operating systems, SQL and networking — including course material and trainee assessment.

#### Systems & Software Engineer

Private sector • 2012 – 2019

*Details of this role are covered by a confidentiality agreement.*

- Developed desktop applications backed by relational databases.
- Administered servers and supporting infrastructure.
- Worked on data processing and reporting.
- Delivered technical training to staff.

## SELECTED PROJECTS

**Smart Task Planner** — apps.odoo.com
Standalone Odoo 19 project-management app published on the Odoo App Store. Interactive Gantt with drag-and-drop rescheduling and dependencies, seven-stage kanban, work sessions and timesheets, personal and executive dashboards. No Enterprise dependency.
Odoo 19 · Python · PostgreSQL · OWL · XML

**Manufacturing Execution Module (Odoo 19)** — client project
Custom module replacing an Excel-based tracking system for precision component manufacturing: chassis preparation, milling, measurement, cleaning/QC, grading and packaging, with ~13,000 records migrated from 16 source sheets.
Odoo 19 · Python · PostgreSQL · XML

**Harmonia** — harmonia-safety.vercel.app
Family safety and location-sharing app: live tracking, SOS alerts, geofenced places, guardian roles and an offline SMS fallback. Built the mobile client, API and self-hosted infrastructure end to end.
React Native (Expo) · TypeScript · Fastify · PostgreSQL · Redis

**Super Proxy Store** — t.me/myproxystore_bot
Telegram commerce bot with crypto wallet top-ups via Cryptomus plus a manual confirmation flow for OMT, Whish and Syriatel Cash — regional payment rails with no public API — behind pluggable supplier adapters.
Node.js · Telegraf · Fastify · PostgreSQL

## TECHNICAL SKILLS

**Languages** — Python · JavaScript / TypeScript · SQL · PHP · Java · XML

**Databases** — PostgreSQL · Oracle · MySQL / SQL Server — design, administration, tuning, migration and analysis

**Backend & APIs** — Fastify · Node.js · Laravel · Spring Boot · RESTful API design and integration

**Systems & Infrastructure** — Linux server administration · Nginx · SSL/HTTPS · systemd · SSH hardening · backup and recovery · VPS and on-premise deployment

**Networking & IT Support** — CCNA certified · network infrastructure · hardware and software troubleshooting · end-user support

**ERP — Odoo** — versions 12 → 19 · custom modules · migrations and version-compatibility · inherited XML views · OWL · QWeb · App Store publishing

**Mobile & Web** — React Native (Expo) · TypeScript · responsive web applications · Arabic RTL interfaces

**Leadership** — technical team management · requirements gathering · risk identification · stakeholder reporting · technical training design and delivery

## EDUCATION & CERTIFICATIONS

**M.Sc. Web Science** — Syrian Virtual University · Jun 2024 | **B.Sc. Software Engineering** — University of Aleppo · Oct 2012

**CCNA** — Cisco Certified Network Associate | **Languages** — Arabic (native) · English (fluent)
